SUMMARY OF QUALIFICATIONS

Director and Head of IT Operations leading enterprise IT, cybersecurity, and systems transformation across global teams. Delivered modernization of identity and access management, endpoint security, governance, and core business platforms to reduce risk and improve operational performance. Oversees vendor strategy, budgeting, and enterprise technology architecture. A security-focused IT leader who brings engineering depth, operational discipline, and enterprise accountability to distributed environments.

WORK EXPERIENCE

Strategic Systems — Dublin, OH (Remote/Hybrid)

Director and Head of IT Operations — *Mar. 2025 – Present*

- Partner with VPs, department heads, and executive leadership to drive enterprise technology strategy, cybersecurity, risk management, and IT operations across the U.S., India, and Brazil.
- Led enterprise modernization of core platforms (CRM, HRIS, M365/Entra, endpoint management, DevOps, and data/analytics), improving cross-functional alignment, operational efficiency, and employee/member experience.
- Led Microsoft Teams Phone rollout across the U.S. and Brazil for Sales/BDMs and front-desk operations, implementing auto attendants and call queues to improve call routing, responsiveness, and visibility into inbound communication.
- Strengthened organizational security posture by enforcing company-wide MFA, enabling encrypted email controls, implementing identity threat detection and response (IDTR), and removing high-risk third-party and AI applications through improved tenant guardrails and policy enforcement.
- Centralized Identity & Access Management (IAM) by expanding SSO and SCIM-based automated provisioning, reducing manual access administration, minimizing lifecycle errors, and improving onboarding/offboarding security.
- Implemented dynamic security groups and transitioned teams away from shared user accounts by establishing functional shared mailboxes, improving access accountability and reducing access drift.
- Established IT governance standards for M365 and SharePoint, consolidating critical data, cleaning up unused groups/sites, and restricting uncontrolled group creation to prevent future sprawl.
- Deployed Microsoft Intune (Unified Endpoint Management) and architected device policies/configurations to standardize compliance and security enforcement, enabling end users to operate on fully managed, secure devices.
- Deployed secure remote access solutions (Tailscale and IPsec tunnels between Azure and HQ) to protect internal and development systems and enable compliant access for distributed teams.
- Improved operational efficiency and brand consistency by automating email signature deployment and enabling centralized messaging for campaigns and promotions.
- Launched an Azure-hosted, SSO-secured internal documentation and self-service platform to scale onboarding and improve knowledge access across departments.
- Initiated an enterprise password manager rollout to improve credential handling, reduce shared-access risk, and strengthen secure access practices across teams.
- Led data and analytics strategy to improve reporting accuracy, operational visibility, and forecasting capabilities across the organization.

Manager – IT Systems — *Jan. 2025 – Mar. 2025*

- Led and mentored engineers through hands-on workshops in application security, automation, and infrastructure best practices, strengthening team capability and delivery quality.
- Owned reliability and security of production and development environments across the organization's technology stack, ensuring scalable and compliant operations.
- Managed enterprise version control systems (VCS), including repository governance, access controls, and permission strategy to strengthen collaboration and reduce security risk.
- Established security policies, compliance controls, incident response process, and disaster recovery readiness to improve operational resilience and audit preparedness.
- Automated provisioning of compliant workstations for onshore and offshore employees, improving onboarding efficiency and reducing manual IT overhead.
- Advised leadership on application selection, budgeting, implementations, and onboarding to support business growth and operational effectiveness.

Data/Security Engineer Consultant *Feb. 2023 – Jan. 2025*

- Mentored developers (junior–senior) on modern data engineering practices to improve delivery speed.
- Built cloud data warehouse solutions and automated ingestion pipelines for real-time analytics.
- Developed API integrations to automate workflows and streamline vendor/client data exchange.
- Partnered with stakeholders to design scalable, compliant data systems aligned to business needs.
- Evaluated and deployed new technologies to solve project challenges efficiently and securely.
- Served as primary security administrator across systems, applications, and internal tooling.
- Created and enforced security SOPs to improve audit readiness and reduce risk.
- Integrated security platforms to strengthen monitoring, alerting, and threat visibility.

Tools & Skills: AWS | Azure | Terraform | Ansible | Docker | Kubernetes | GitHub | GitLab | Linux | Bitwarden | Wazuh | Grafana | Datadog | SigNos | HubSpot | Paycom | QuickBooks | Atlassian | Postman | Spacelift | Metaplane | Fivetran | Apache Airflow | Kestra | Matillion | Coalesce | DBT | Snowflake | Databricks | GCP | Iceberg | Python | AI | ML | MCP

Verosint **Austin, TX (Remote)**

Software/Data Engineer *Mar. 2022 – Feb. 2023*

- Developed and enhanced Golang applications to improve scalability, maintainability, and performance.
- Implemented Datadog monitoring, improving observability and reducing mean time to resolution (MTTR).
- Designed and deployed APIs and ETL integrations, reducing infrastructure costs and improving internal/client analytics accuracy.
- Partnered with product and operations teams to deliver secure, reliable features supporting business and compliance needs.
- Performed code reviews and provided feedback on security, efficiency, and engineering standards.

Tools & Skills: Golang | GitHub | GitLab | Datadog | Neo4j | CI/CD | Kubernetes | Linux | AWS

Navitus **Appleton, WI**

Data Engineer *Aug. 2019 – Mar. 2022*

- Built and automated Informatica ETL pipelines powering 90% of reporting and audit readiness.
- Implemented PHI/PII encryption with security teams to meet HIPAA, CMS, and financial standards.
- Developed API-driven pipelines to load CMS exports into the enterprise warehouse, improving audit efficiency.
- Supported operations by troubleshooting and optimizing SQL/ETL workflows, improving reliability and throughput.
- Balanced competing priorities across Government Programs and Operations teams to meet delivery commitments.

Tools & Skills: Informatica | Linux | Bash Scripting | ERD | Data Architecture | Data Normalization

Thrivent Financial **Appleton, WI**

Data Engineer *May 2016 – Aug. 2019*

- Designed and deployed Informatica ETL solutions and Bash automations, reducing manual effort for business teams.
- Authored SOPs for development environments and applications, improving consistency and onboarding speed.
- Supported disaster recovery testing and continuity planning to improve system resilience and compliance readiness.
- Mentored interns and contractors on ETL best practices, accelerating ramp-up and delivery quality.
- Troubleshoot and optimize SQL queries to improve reporting performance and reliability.

Tools & Skills: Informatica | Linux | Bash Scripting | Data Governance | SQL Optimization | Workflow Automation

EDUCATION

St. Norbert College **De Pere, WI**

Master of Business Administration *Sep. 2019 – May 2022*

- 3.9/4.0 GPA

University of Wisconsin – Green Bay **Green Bay, WI**

BS, Computer Science and German *Sep. 2013 – May 2017*

- Magna Cum Laude; 3.8/4.0 GPA

CERTIFICATIONS

Informatica | Matillion | Snowflake
